

Underwater Creatures and Habitats

Workshop	Underwater Creatures and Habitats
Key Stage	Key Stage 1-2
Recommended Age Group	5-11
PoS	Science
Course Description	Dive into the amazing underwater world of the LEGOLAND® Atlantis Submarine Voyage! Students will learn about the characteristics of underwater creatures and their habitats. In pairs, they will build their own Sea Underwater Creature, identifying and ensuring that their chosen design best fits in the chosen habitat
Duration	45 Minutes
Equipment	LEGO Bricks
Capacity	30 students
Lesson Objectives	<ul style="list-style-type: none"> ✓ Students will discover underwater animals and the habitats that they live in ✓ Students will understand how creatures have adapted to live in underwater environments through camouflage, predator, prey and adaptation ✓ In pairs, students will demonstrate their understanding through designing and creating their own animal, for a specific habitat, and present back to the group
